

## Finger Prints

*"The fact that you were born is evidence that God knew Earth needed the potential that you're pregnant with. It is therefore imperative that you refuse to leave this planet without giving birth to those dreams, ideas, visions and inventions that you carry within the womb of your faith right now." ~ Anonymous*

When I heard this quote I felt compelled to share it with you. Maybe I'm a bit biased because what I've learned through Hand Analysis is that we each do have a purpose for being here and there are requirements to fulfill that purpose. Having read over 8300 pairs of hands, I can tell you that with each person something "rings their chimes" and makes them feel sooooo good about being here on the planet.

Your entire body is your Soul Map for this lifetime. And your hands are a microcosm of your body, so that's why they serve as a Soul Map. This amazing, specific and sacred map in your body and hands tells you exactly what your Life Purpose is.

In your hands it's your fingerprints that actually *identify* your Life Purpose.

And the map shows you the *gift* of living your Life Purpose: feeling soulfully satisfied. Nothing else can fill you in the same way or for as long. And nothing can substitute in your life for living your Life Purpose.

And it truly is a gift that keeps on giving because when you can give that deep sense of fulfillment to yourself, you give it to everybody around you because of the ripple affect.

Your family, friends and co-workers see and feel your joy. Then it translates into, "Maybe I could feel that much joy, too." When you feel good about your life, the energy radiates and attracts more good energy. The Gift keeps on giving.

And so is the journey of knowing your Soul Map: to live what is in your hands to the fullest extent. I do believe you can't be too far off your Life Purpose path because it would just be too, too difficult. But to be fully engaged in it, now that's a different story.

### ***Technically Speaking:***

Starting at 14 weeks after conception, the fingerprints begin to form. Between 16 and 20 weeks, they are completely formed, even before some other organs have developed. And we all know from the mass of television programs related to solving crimes that fingerprints never change. So from birth to death, and even before birth, you have a reason for being here: a very specific reason that your fingerprints tell you.

And your fingerprints identify your biggest challenge called your Life Lesson. Wouldn't it be great to have a language for the patterns that continually show up in your life that feel like obstacles? And wouldn't it be even better to have a map on how to identify the behaviors associated with those obstacles? And then, the best part, what to do to change your focus from Life Lesson to Life Purpose?

It's all in your fingerprints. Contact me today for your personal Hand Analysis. [Click here](#) to be linked to the Services Page.
